Job Description: AI/ML & Full-Stack Developer Intern

Company: InnovateAI Technologies

Location: Remote / Bhopal

Duration: 3-6 months Internship

Responsibilities:

- Collaborate with the team to develop AI-powered applications using Python, Scikit-learn, and TensorFlow.

- Design backend logic and APIs using Python (Flask/FastAPI).

- Integrate ML models into full-stack applications.

- Build resume-screening tools using NLP techniques like spaCy and TF-IDF.

- Create data visualizations with Matplotlib and Pandas.

- Use GitHub for version control and manage projects in VS Code/Jupyter.

- Apply knowledge in data structures and algorithms to optimize model performance.

Requirements:

- Pursuing a B.Tech in Data Science or similar (2022-2026 batch preferred).

- Strong skills in Python, C++, ML libraries (Scikit-learn, TensorFlow).

- Familiar with Git, GitHub, and full-stack project development.

- Completed projects like resume screening or predictive analytics.

- Good communication skills and logical thinking.

- Bonus: Experience using Firebase, Agentic AI, or working on Generative AI applications.
